

Civil Engineer II - Water | Wastewater Treatment

Atlanta Metro (Duluth, GA)

Founded in 1954, Keck + Wood, Inc. is a growing and dynamic employee-owned consulting firm with four offices in Georgia and South Carolina. Our 60+ employees serve Community Development, Transportation, Survey and Utility clients across the southeast by providing quality engineering, planning, landscape architecture, and land surveying.

Today, Keck & Wood offers great opportunities for individuals interested in Engineering, Landscape Architecture or Planning to join our team and make a difference.

Collaboration By Design is not just a tagline, its the foundation of how Keck + Wood serves clients, improves communities, and strengthens its employees.

Challenging and rewarding opportunities are here....are you ready?

The civil project engineer for water | wastewater treatment is for experienced engineers who design water and wastewater treatment systems. Design assignments may include preliminary engineering reports, field investigation, process calculations, equipment research, cost estimating, technical specifications, pumping, hydraulic modeling, construction drawings, bidding administration, and construction administration. Project Engineers will collaborate with senior Project Managers for skill development and mentoring. The right candidate will have the skills and experience to address the following tasks:

- Develop construction documents utilizing best practices, calculations and other engineering skills to support indicated scope, schedule, budget and client expectations
- Utilize your knowledge of codes, rules and regulations that apply to each project type
- Research and investigate technical data, Prepare reports, permit & funding applications
- Conduct site visits & address RFI's pay applications, punchlists, and other construction administrative duties.
- Initiate communications with clients, consultants and internal design team
- Ability to supervise & mentor junior staff and lead small projects
- Assist project manager and marketing with building proposals, schedules & budgets
- Attend conferences & actively participate in professional organizations
- Support project manager with invoicing, progress reports, close out data, etc.
- Assist clients with unforeseen needs that can help advance projects or initiatives

Our goal is to make you successful in work...and in life!

Keck & Wood provides a culture for you to thrive, instead of just collecting a paycheck. From team outings to company events, we provide opportunities for you to connect with others in the company on both a professional and personal level. Our flex schedule attitude helps you achieve a suitable work-life balance to grow your career, without having to give up your life to do it.

Supporting our competitive pay, our compensation packages can also include 401(k) contribution match, spot bonuses, performance-based incentive pay, and our Employee Stock Ownership Plan (ESOP). Benefits can provide peace of mind to focus on your career, so our packages typically include medical, dental, vision, short and long-term disability insurance, paid holidays, paid time off for sick & vacation leave, paid time off for eligible volunteer service, and more.

Visit our website for a full list of compensation opportunities and benefit options to grow your career and build your life.

The right skills....for your success!

We're looking for candidates with the following qualifications:

- Bachelor's Degree in Civil Engineering or equivalent from an accredited institution
- Professional License – EIT required, PE (or ability to obtain within 12 months)
- Minimum of three years of related A/E/C experience
- Proficient with Civil 3D, CAD, GIS and Office tools; be open to learn specialty software
- Strong written & verbal communication skills; ability to thrive on a team
- Ability to embody our brand by treating clients and employees with courtesy and respect

Work is primarily performed in an office environment with occasional travel to project sites for construction review and contract administration. Fieldwork involves exposure to weather, traffic, and loud noise and requires extensive walking over uneven surfaces and various terrains.

Project engineers represent the core of our approach to providing design solutions to clients. They are at the center of the analysis, due diligence, troubleshooting, and development of solutions that grow and maintain infrastructure for our clients.
